

**Bergen 28 August 2020**

Montal group consists of a Swedish and Norwegian company, where the Norwegian works closely with Stal-Tech

We have sales of approximately NOK 40 million in Norway and SEK 60 million in Sweden in 2020 in building and construction / infrastructure marked.

Our business vision is to have control of "own products" we deliver.

Requirements for reliability, high quality and not least capacity are important factors and Stal-Tech delivers well on this.

Stal-Tech delivers high internal professional competence, orderly and streamlined production, large capacity, and market prices as well as predictability.

Our collaboration has been going on for many years and because of the good collaboration we have hired two designers who live and work from Szczecin.

The products we produce together with Stal-Tech are many, but mainly:

- Steel balconies
- Steel railings
- Special steel constructions (bridges, shock shield systems)
- Steel stairs

We have a very positive development in the Scandinavian market and will continue to work with Stal-Tech for a long time.
